

Title: Energizing Your Classroom with Geospatial Technologies

Date/Time: Wednesday, July 30, 10:30 AM – 11:15 AM

Location: Renaissance Austin Hotel

Description: This session will cover various geospatial applications such as alternative energy and landscape and land planning technology utilizing the latest geographic information systems and GPS. It will also demonstrate the impact that geospatial technologies can have on all areas of study. These technologies have exploded in their applications as well as becoming easier to use and build data sets. Participants will work with a small project for demonstration purposes.

Presenter:

Robert Welch, Professor and Program, Director at Lansing Community College.
