

Title: Doing GIS with Citrix

Date/Time: Thursday, July 31, 2:30 PM – 4:30 PM

Location: Renaissance Austin Hotel

Description: A discussion of using virtual computers for students wishing to learn GIS at both the secondary and postsecondary levels. One of the problems with delivering remote instruction in GIS is the lack of software required for the applications. GIS case studies will also be reviewed. Participants will actually hit a Citrix GIS Server.

Presenter:

Vincent A. DiNoto, Jr. is a professor of Physics and Astronomy at Jefferson Community and Technical College, and Director of Academic Technology. In addition, he is Co-PI of the Kentucky Information Technology Center for the Kentucky Community and Technical College System. He holds a B.S. (1977) and M.A. (1979) in Physics from Indiana State University in Terre Haute, Indiana, with additional graduate classes from Indiana University Southeast, Ball State University, and Indiana State University. He has been a faculty member at Indiana State University and Indiana University Southeast. He is currently co-Mentor for the American Association of Community Colleges, Mentorlink project in geospatial technology. He has been project director or principal investigator/co-principal investigator on numerous other grants from both public and private sources.
